REMARKS

This application has been allowed as of January 17, 1992. Since receipt of the Notice of Allowance and Issue Fee Due, applicant has noticed minor errors which need correction prior to printing. These errors are corrected by the amendments above and will yield a clearer and better defined final patent on issuance. None of these amendments provide any basis for which further examination will be required; they are intended merely to correct typographical errors, correct errors relating to lack of proper antecedent basis, and clarify the title and abstract making them more relevant to the application as allowed rather than retaining the original title and abstract which were more relevant to the application as originally filed prior to restriction requirements and subsequent filing of divisional applications.

The revisions of the title and abstract more accurately reflect the contents of this application as it has been allowed. The previous title and abstract were properly reflective of the application as filed prior to

restriction requirements and subsequent divisional application filings.

The change proposed in Claim 6 will clear up an error in that the deleted term lacks an antecedent basis in Claim 25 from which Claim 6 depends. The newly substituted term does indeed find antecedent basis in Claim 25 and is the proper term to be used in this dependent Claim 6.

The proposed amendment of Claim 25 merely rectifies a typographical error and substitutes a proper term for an incorrect one.

Applicant respectfully requests entry of this amendment prior to final printing of the issued patent.

Respectfully submitted,

March 18, 1992
